FOAM WORX Insulators, LLC  
1212 Home Court  
Raleigh, North Carolina 27603

Attn: Rich Brown

Dear Rich,

Good to see you in New Orleans!! I would also like to congratulate FOAM WORX on being named one of the top 25 dealers internationally with Icynene Insulation. That is a tremendous accomplishment so early in your tenure with the company.

In discussions with our GC developing the 1,600 square foot mother in law suite on the first floor of our home it was a no brainer when we were offered the possibility of upgrading to the Icynene Insulation System. Having used Owens Corning Fiberglass in the remainder of our home it was apparent there could be some gain from using Icynene not only for energy savings and being a green product, there was also concern over yellow pollen coming into our roof through the current baffle system.

During installation your crews worked perfectly through two visits as on the first one the drywall people had not adequately finished their part of the construction. The cleanup was excellent & there was no mess to the floor from spraying the roof.

We have now been through both a cooling and heating season and amazingly have experienced no increase in energy cost from the 1,600 square foot addition. We also are not experiencing yellow pollen on our various storage areas with the new attic nor air traffic noise we experience from planes landing at the new Raleigh airport.

I would be happy to speak with anyone concerning this experience and share how pleased we are. Thanks again for the superior effort and quality Icynene Product!!!!
